FACILITY

- Project will replace the main building due to its aging and damaged structural foundation system and replace the Winnie Brown Gym, natatorium, and vocational building.
- Project will leave the East Annex, field house, new cafeteria, and athletics fields in place.
- Project will be constructed in several phases spanning over multiple years.
- The district plans for students and staff to remain in the main building until the completion of the first academic building.
- Once the new academic building is complete, the construction of new fine arts and athletics facilities will begin. Upon the completion of the new buildings, the main building will be demolished.
- The Sterling site is approximately 68 acres, which is adequate space for the replacement. The existing site allows space for new facilities to be constructed with minimal impact to the existing campus.

TECHNOLOGY

- Network hardware refresh, including network and distribution switches, and core networking equipment

ATHLETICS

- Strength & conditioning upgrades
- Gym and field bleacher upgrades
- Gym scoreboard upgrades
- Baseball/softball batting cage renovations
- Tennis court resurfacing
- Resurface track

TRANSPORTATION

- Maintain bus standards

\$100,000
Taxable Value

\$6.67
Per Month

\$80.04
Per Year

Homeowners 65+
will have zero tax impact.
