# Where to Go for Care

What do you do if your clutch player breaks an arm in the big game? Or you slice your finger chopping veggies? Or have stomach cramps after last night's sushi date? Often the choice is clear. If you have signs of a heart attack, it's best to go to the emergency room. But what if you have a sore throat? Or lower back pain?

Knowing where to go can make a big difference in the cost of your care – especially when you use in-network providers.

## Know the Difference: Freestanding ER vs. Urgent Care Center

Freestanding ERs look a lot like urgent care centers, but may not be affiliated with an in-network hospital. That means you could end up with a hefty bill (or several bills). You might even be sent to a hospital ER for care! Here are ways to spot a freestanding ER:

1. Look for "Emergency" on the building exterior.
2. Check the hours. If it's open 24/7, it's a freestanding ER. Urgent care centers close at night.
3. Confirm it's not connected to a hospital.
4. Ask if it follows the copay, coinsurance and deductible payment model.

**If you need emergency care, call 911 or seek help from any doctor or hospital immediately.**

**Note:** Many sites of care now offer telehealth options for your visit. Check with your preferred provider to see if they offer telehealth visits.

1. 24/7 Nurseline is not a substitute for a doctor's care. Talk to your doctor about any health questions or concerns.

2. Virtual Visits may be limited by plan. For providers licensed in New Mexico and the District of Columbia, Urgent Care service is limited to interactive online video; Behavioral Health service requires video for the initial visit but may use video or audio for follow-up visits, based on the provider's clinical judgment. Behavioral Health is not available on all plans.
